CONTINUED FROM OVERLEAF:

A

B

A) Remove lower fairing bolt to aid access to OE silencer clamp

B) Remove the three bolts shown to expose the exup valve & cables

C) Disconnect the cables by unscrewing the adjusting nuts & lift the nipples out of the wheel

You can now remove the OE silencer by removing the clamp & top hanging bolt

C

D

D) Before fitting the Scorpion silencer, use the cable-tie to safely attach the loose cables to the lambda sensor wire & trim the cable-tie.

E) Now remove the O.E flare and gasket from the exhaust so Scorpion product can fit the O.E.

F) Fit the Scorpion silencer with the new clamp & OE bolt and fasten securely with the Nyloc nut, then tighten the clamp.

E

F

Ensure all cables and any fitments are secured safely and all original functions work correctly prior to use.
