NOTE: Fitting instructions show the installation of our Serket Silencer however fitting is the same for the Red Power Silencer.

A) Remove the lambda sensor from the original exhaust

B) We recommend removing the radiator support bracket to allow more access to the header nuts. Remove the bolt circled red.

C) Once the bolt is removed pull the pin from the mounting rubber.

D) Remove all 6 header nuts.

E) On the left hand side remove the mounting bolt.

F) On the right hand side support the silencer whilst removing the bolt. The system is now free from the bike and can be removed.

G) On the left hand side remove the metal insert and rubber bush from the mounting hole as this is not required when fitting the Scorpion system.

H) Fit the mounting bracket behind the right hand pavilion foot peg. Re-fit the foot peg using the original bolts and spacer.

I) Starting from the left loosely fit the scorpion header pipes. Do not fully tighten until the whole system is fitted.

J) Insert the header pipes into the collector.

K) Fit the connecting pipe to the collector. Use the original bolt to secure the pipe to the bike.

L) Slide the silencer on to the connecting pipe. Secure the silencer to the mounting bracket using the nuts and bolts provided.

M) Starting from the front of the bike fit the springs between the spring hoops.

N) Once happy with the alignment of the exhaust, fully tighten the header pipes.

O) Re-fit the radiator support bracket and secure with the original bolt.

P) Remove the two bolts on the left hand radiator panel.

Q) Remove the two plastic plugs on the left hand radiator panel and remove the panel from the bike.

R) Snip the two cable ties holding the lambda cable.

S) Unplug the lambda cable and plug in the lambda extension cable provided.

T) Loop the cable back on itself feeding the wire through the channel at the top. Ensure the cable is not obstructing the holes.

U) Feed the cable through the frame of the bike on the left hand side.

V) Use the original cable clips on the side of the engine casing to hold the cable.

W) Fit the lambda cable to the boss on the Scorpion system.

X) Plug the lambda cable in to the extension cable.

Y) Use the cable tie provided to secure the cable.

Z) Re-fit the radiator side panel using the original fittings.

When fitted take bike for a short ride to ensure all functions are correct. When bike & exhaust are cool enough check all nuts and bolts are still secure.
